

Bus Garage Safety Toolkit / OSHA Compliance - \$2,000

The Need

The *OSHA Compliance Toolkit* is a single source management tool designed specifically for transit and paratransit operations. Used properly it will help managers quickly and easily achieve compliance with OSHA regulations in the least amount of time and with the least amount of effort.

Comprehensive course includes:

For Mechanics

1. Emergency Response Plan
2. Lockout/Tagout
3. Hazards Communication
4. Lifts, Pits, Jacks and Stands
5. Fire Protection
6. Rails, Stairs and Ladders
7. Signage
8. Slips, Trips and Falls
9. Diesel Exhaust
10. Electrical Hazards
11. Hand Tools
12. Machine Guarding
13. Fuel Islands
14. PPE
15. Emergency Eyewash
16. Confined Spaces
17. First Aid and Bloodborne Pathogens
18. Forklift Safety
19. Multi-Piece/Single Rim Wheels
20. Spray Finishing
21. Welding
22. Fall Protection
23. Storage

For Drivers

1. Lockout/Tagout
2. Hazards communication
3. Bloodborne Pathogens

Usage:

Shop managers
Technicians
Mechanics
Drivers

Working in the shop involves many hazards that can injure or even kill an employee.

OSHA requires that all reasonable steps be taken to protect the employees working in the shop and can take action to enforce compliance with their safety requirements. This may involve substantial fines and even stronger actions, such as jail time or closure.

This course includes an easy to follow process guide that allows you to document all training and actions provided. It takes six hours each year to be in compliance.

The Process Guide includes action plans and checklists with step-by-step instructions detailing what you must do to be in compliance.

If you follow every action plan and document every action step, you'll be in compliance. It's that simple.
